

# Fida Fathima

Software Engineer

## Professional Summary

Seeking a Frontend Developer role where I can leverage my experience and technical skills to design and develop user-friendly web interfaces. Dedicated to contributing to a successful and innovative development team, I aim to deliver exceptional user experiences through creative and efficient frontend solutions.

## Work History

2022-08 -  
Current

### Software Engineer

Gadgeon smart systems Pvt Ltd, Kochi, India

- Designed and maintained responsive web applications using React.js, HTML, CSS, and JavaScript.
- Engineered robust APIs with .NET to optimize data exchange and streamline system functionality, facilitating seamless communication among software components.
- Implemented LINQ within .NET applications to simplify data querying and enhance code readability.
- Proficiently employed MySQL alongside .NET for efficient database development and testing, ensuring data integrity and optimal performance.
- Conducted thorough manual testing of JSON and web-based applications, ensuring software reliability and high quality.
- Developed automated test scripts using UFT (Unified Functional Testing) to augment test coverage and bolster the reliability of web applications.
- Fostered effective collaboration within cross-functional teams, meticulously documenting test plans and results, while actively staying abreast of industry best practices.
